Awesome companies I've worked for

Hero Digital LLC

February 2021 – Current

Remote – Georgia

Working as a front-end developer in dynamic data driven enterprise content management systems (CMS). I implemented time sensitive features and troubleshooted complex issues. Collaborating with team members to deliver exceptional products for clients.

Exciting Projects

U.S Bank

Improved and maintained internal sites for U.S Bank while working at Hero Digital.

- Smoothed onboarding with developer documentation
- Automated IE11 code conversion with gulp environment
- Built complex user interfaces with dynamic data
- Converted depreciated code when upgrading CMS versions
- Implemented WCAG AA compliance changes

Stack: Liferay(CMS), HTML5, CSS, Gulp, JavaScript, jQuery

Business Twitter

Developed a public calendar marketing page while working at Hero Digital.

- Created new maintainable React.js components
- Implemented key functionality such as pagination, filters, event regions, and language translations.
- Followed strict workflows and code requirements
- Rapid work environment that required adaptability

Stack: AEM(CMS), React, SCSS, JavaScript, HTML

Page link:

<https://business.twitter.com/en/resources/twitter-marketing-calendar.html>

ps. Twitter is constantly updating their sites. Some features of this page may be after I did the original development.

Cedars Sinai

Implemented component based modular design system.

- Redesigned reusable core components.
- Adaptive styles for light and dark themes
- Continuous collaboration with team on changing requirements

Stack: AEM(CMS), React, SCSS, JavaScript, HTML, Docker

Technical Skills

React.js

Bootstrap CSS

JavaScript (ES6, ES7, ES8)

jQuery

HTML5

Materialize CSS

CSS, SCSS (Sass)

NPM, NVM

Liferay, AEM

My Education

Computer Programming Associate

Southern Crescent Technical College

December 2019

3.9 Grade Point Average

Nucamp Bootcamp

Full stack web-development

November 2020
